FOR IMMEDIATE RELEASE

ONE WAY TRAFFIC CONTROL ON SR 36 BEGINS NOVEMBER 14, 2011

REDDING –The California Department of Transportation (Caltrans) will begin installation of overflow culverts on State Route 36 near the intersection of SR 36 and US 395 on Monday, November 14, 2011. The project is scheduled for 15 working days and is weather dependent.

Overflow culverts will help alleviate flooding across State Route 36 and augment the existing culvert, which can become inundated during a major storm event. State Route 36 is part of the National Highway System and is a main east-west route. The addition of these overflow culverts will allow the passage of emergency vehicles and the traveling public during major storm events.

Installation of the culverts will require 24-hour one-way traffic control between November 14th and November 23rd. Motorists can expect delays and thus are encouraged to take alternate routes.

For more information please visit the Caltrans District 2 website at www.caltrans2.info, follow CaltransD2 on Twitter or call the Caltrans District 2 Public Information Office at 530-225-3260.
